BRITISH GEOLOGICAL SURVEY

The full range of our publications is available from BGS shops at Nottingham, Edinburgh, London and Cardiff (Welsh publications only) see contact details below or shop online at www.geologyshop.com

The London Information Office also maintains a reference collection of BGS publications, including maps for consultation.

We publish an annual catalogue of our maps and other publications; this catalogue is available online or from any of the BGS shops.

The British Geological Survey carries out the geological survey of Great Britain and Northern Ireland (the latter as an agency service for the government of Northern Ireland), and of the surrounding continental shelf, as well as basic research projects. It also undertakes programmes of technical aid in geology in developing countries.

The British Geological Survey is a component body of the Natural Environment Research Council.

Acknowledgements

The compilers of this volume are grateful for the help received from the Office for National Statistics, the Department for Business, Innovation and Skills, the Department for Communities and Local Government, the Department of Energy and Climate Change, the Crown Estate Commissioners, The Crown Mineral Agent, the Northern Ireland Department of Enterprise, Trade and Investment and the Isle of Man Department of Trade and Industry. They would also like to acknowledge the valuable assistance given by the World Bureau of Metal Statistics, the UK Iron and Steel Statistics Bureau, the Mineral Products Association, The Coal Authority and the numerous companies that have generously provided additional information.

|--|----|
| Value of UK minerals production 2012 | .9 |
| Value of UK construction and industrial minerals production 2012 | .9 |
| GB production of crushed rock aggregate and sand and gravel by region 2012 | 20 |
| GB production of crushed rock by end-use 2012 | 38 |
| GB production of sand and gravel by end-use 2012 | 74 |

Explanatory notes

Coverage: Except where otherwise stated all the statistics shown relate to the United Kingdom of Great Britain and Northern Ireland.

The Channel Islands and the Isle of Man are also included in the 'United Kingdom' overseas trade statistics, but are excluded from the production statistics. The UK part of the Continental Shelf is included in both the overseas trade and the production statistics.

All figures for the latest year shown are provisional and subject to revision.

Rounding of figures: In tables where figures have been rounded to the nearest final digit, there may be a slight discrepancy between the sums of the constituent items and the total as shown.

Units: The statistics in this volume are expressed in metric units. The following factors are given for converting from or into non-metric units:

| | |
|-------------------|-----------------|
| <i>Troy ounce</i> | <i>Kilogram</i> |
| 1 | = 0.0311035 |
| 32.1507 | = 1 |

| | |
|--------------|-----------------|
| <i>Pound</i> | <i>Kilogram</i> |
| 1 | = 0.453592 |
| 2.20462 | = 1 |

| | |
|----------------------|-----------------|
| <i>Hundredweight</i> | <i>Kilogram</i> |
| 1 | = 50.8023 |
| 0.019684 | = 1 |

| | |
|-----------------|--------------|
| <i>Long ton</i> | <i>Tonne</i> |
| 1 | = 1.01605 |
| 0.984206 | = 1 |

| | |
|--------------------|---------------------|
| <i>Square yard</i> | <i>Square metre</i> |
| 1 | = 0.836127 |
| 1.19599 | = 1 |

| | |
|-------------------|--------------------|
| <i>Cubic yard</i> | <i>Cubic metre</i> |
| 1 | = 0.764555 |
| 1.30795 | = 1 |

| | |
|------------------|--------------|
| <i>UK gallon</i> | <i>Litre</i> |
| 1 | = 4.54596 |
| 0.2199755 | = 1 |

Symbols: The following symbols are used throughout:

| | |
|-----|--|
| ... | Figures not available |
| 0 | Quantity less than half the unit shown |
| — | Nil |
| nes | Not elsewhere specified |
| BGS | British Geological Survey |

Apparent consumption: BGS estimates of apparent consumption of metals are based on the formula: production (primary and secondary) plus imports minus exports. All the main traded forms of the metal are taken into account, for example, ores, concentrates, intermediate products, unwrought metal and alloys, oxides, etc. Figures are given in terms of metal content. No information is available for stock changes. Such estimates of apparent consumption are made for metals for which there are no reported consumption statistics: in this edition data are given for chromium, cobalt, manganese, molybdenum, titanium and zirconium.

Trade: Trade figures from INTRASTAT, the system for measuring intra-EC trade became available from 1993. This was introduced following the abolition of customs controls as a result of the Single Market and trade figures are now compiled

from data provided directly from companies instead of Customs documents. Extra-EC trade continues to be collected from Customs declarations as before. The transition from one system to another has produced some anomalous figures in terms of the size of the trade in and unit value of certain commodities. These factors should be taken into consideration when evaluating trends. Figures given in this edition are the combined intra and extra-EC trade data.

Values of commodities are c.i.f. (Cost, Insurance and Freight) for imports and f.o.b. (free on board) for exports.

The terms 'scrap', 'unwrought' and 'wrought' metal include alloys unless these are separately shown.

Exclusion of warranty

Use by recipients of information provided by the BGS, is at the recipients' own risk. BGS has taken care to ensure that information provided is as free from error as is reasonably practical. In view of the disparate sources of information at BGS's disposal, including such material donated to BGS, that BGS accepts in good faith as being accurate, the Natural Environment Research Council (NERC) gives no warranty, expressed or implied, as to the quality, accuracy, performance, and merchantability of the information supplied, or to the information's suitability for any use whether made known to BGS or otherwise. NERC/BGS accepts no liability whatever in respect of loss, damage, injury or other occurrence however caused.

Sources of information

In compiling this volume the BGS has largely relied upon data originally collected by other bodies. A list of the departments and organisations concerned is given below, together with the titles of principal publications that have been used. In many cases the BGS has also been provided with supplementary or unpublished information. Interested readers are strongly advised to consult the original sources themselves wherever possible and in this connection may wish to refer not only to the publications as listed here, but also earlier issues in the same series, some of which were published under different titles.

Information about the production of minerals in the United Kingdom is given from 1853 to 1881 in a series of Geological Survey Memoirs entitled *Mineral Statistics*, by Robert Hunt, Keeper of Mining Records; earlier information for certain metalliferous minerals is also available. Since 1873 all collieries and metalliferous mines have been required by statute to complete annual returns of production, and since 1895 the same has applied to quarries. These returns were made to the Home Office, which, in 1882, was made responsible for the publication of *Mineral Statistics*. In 1920 responsibility for collection of returns was transferred to the Mines Department (Board of Trade) and statistics were subsequently published in the Annual Reports of the Secretary of Mines. The Mines Department was incorporated into the Ministry of Fuel and Power in 1942 and statistics from 1938 to 1972 were published in their Statistical Digests (subsequently the Digests of Energy Statistics of the Department of Trade and Industry). In 1973 responsibility for the collection of returns relating to most minerals other than fuels was transferred to the Business Statistics Office (formerly part of the Department of Trade and Industry, now the Office for National Statistics). The Department of Energy and Climate Change, collects statistics relating to hydrocarbons (natural gas and crude petroleum). Statistics on coal production are now collected by The Coal Authority. Returns of sand and gravel were collected by the Department of the Environment up to 1974. Details of mineral production in Northern Ireland since 1922 have been obtained by the Northern Ireland Government.

1853–1881 *Mineral Statistics*, by Robert Hunt, Keeper of Mining Records; Memoirs of the Geological Survey

1882–1896 *Mineral Statistics*; Home Office

1897–1919 *Mines and Quarries*: General Report with Statistics; Home Office

1920 *Mines and Quarries*: General Report with Statistics; Mines Department, Board of Trade

1921–1938 *Annual Report of the Secretary of Mines*; Mines Department, Board of Trade (Great Britain only from 1922)

1938–1972 *Statistical Digest*; Ministry of Fuel and Power (Great Britain only)

1973–2014 *Digest of United Kingdom Energy Statistics*; Department of Energy and climate change (formerly published by Department for Business Enterprise and Regulatory Reform, Department of Trade and Industry or Department of Energy)

(a) Where more than one mineral is extracted at a mine or quarry all employment is attributed to the chief mineral.

(b) Oil and Gas UK estimates the workforce employed on the UK Continental Shelf at 450 000, of which 36 000 are directly employed by exploration and production companies.

(c) Including surface and underground workers at mines.

These figures should not be used for time series analysis due to changes in question format over recent years.

(a) Slurry etc. recovered from dumps, ponds, rivers etc.

(b) Marketable product (KCI).

(c) Including ethane, propane and butane, in addition to condensates.

(d) Dry weight.

(e) Excluding a small production in Northern Ireland.

(f) BGS estimates based on data from producing companies.

(g) Slate figures include waste used for constructional fill and powder and granules used in industry.

(h) BGS estimate.

(i) Including marine-dredged landings at foreign ports (exports).

(j) Excluding a small production of granite in Northern Ireland.

(k) In addition, the following amounts of igneous rock were produced in

Guernsey (thousand tonnes): 2006: 136; 2007: 160; 2008: 139; 2009: 120; 2010: 116; 2011: 156; 2012: 169 and Jersey: 2007: 295; 2008: 325;

2009: 249; 2010: 238; 2011: 220; 2012: 239.

(l) Contains an estimate related to Northern Ireland production.

(a) Slurry etc. recovered from dumps, ponds, rivers etc.

(b) Including potter's clay.

(c) Including ethane, propane and butane, in addition to condensates.

(d) Marketable product (KCl).

(e) BGS estimate.

(f) Including marine-dredged landings at foreign ports (exports).

(g) Slate figures include waste used for constructional fill and powder and granules used in industry.

(h) Including dolomite for constructional uses.

(i) Dolomite and magnesian limestone used for constructional and agricultural purposes as well as for refractory, chemical and other purposes specifically dependent on the high magnesium content.

(j) Dry weight.

(a) Including production from marine dredging.

(b) Includes small quantities for other purposes in Northern Ireland.

(c) For a number of years, a significant amount of armourstone imports were believed to be wrongly classified as 'granite, crude'. Care should be taken when comparing long time trends.

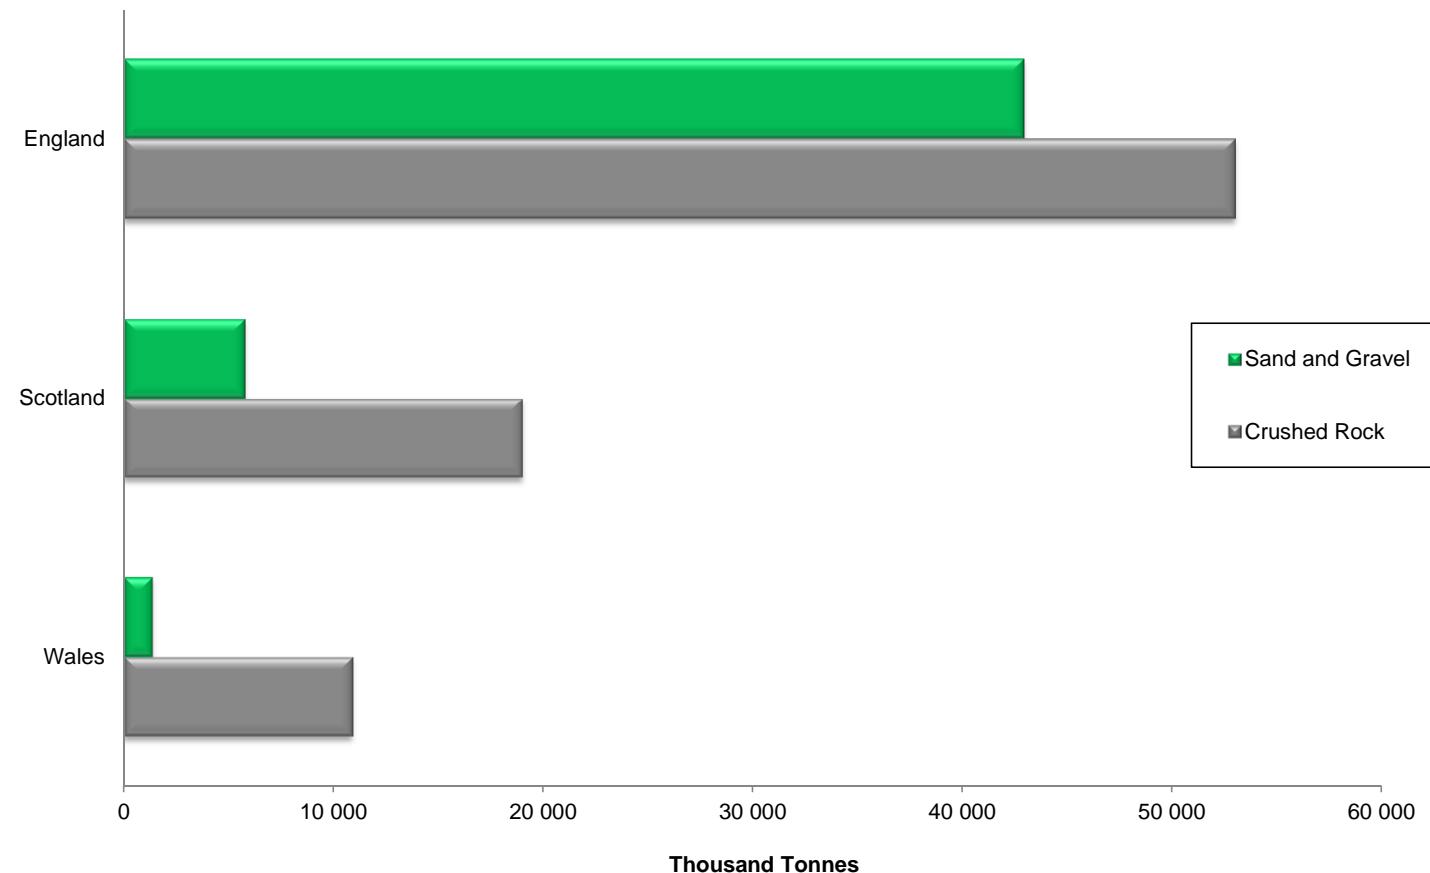

(d) Includes an estimate for Northern Ireland.

(e) Principally marine-dredged sand and gravel.

Source: HM Revenue and Customs.

However, the Crown Estate Commissioners give the following figures for marine-dredged sand and gravel landed at foreign ports (tonnes):
2008: 6 211 703; 2009: 5 660 522; 2010: 5 192 348; 2011: 6 098 020; 2012: 4 548 675.

Great Britain production of crushed rock aggregate and sand and gravel by country 2012

England and Wales summary of consumption of primary aggregates, by region 2009 (a) (b)

Thousand tonnes

| Region | Land-won sand and gravel | Marine sand and gravel | Total sand and gravel | Crushed rock | Total primary aggregate |
|-----------------------------|-----------------------------|---------------------------|--------------------------|---------------|----------------------------|
| South West | 2 960 | 511 | 3 471 | 12 238 | 15 710 |
| South East | 5 679 | 4 700 | 10 380 | 5 383 | 15 762 |
| London | 1 459 | 3 824 | 5 283 | 4 086 | 9 369 |
| East of England | 8 412 | 336 | 8 748 | 4 276 | 13 024 |
| East Midlands | 5 569 | 0 | 5 569 | 10 613 | 16 183 |
| West Midlands | 5 427 | 17 | 5 444 | 5 040 | 10 484 |
| North West | 1 891 | 76 | 1 967 | 10 299 | 12 266 |
| Yorkshire and the Humber | 2 980 | 234 | 3 214 | 7 779 | 10 993 |
| North East | 1 444 | 515 | 1 959 | 3 522 | 5 481 |
| England | 35 821 | 10 214 | 45 035 | 63 236 | 109 271 |
| South Wales | 209 | 516 | 724 | 5 886 | 6 611 |
| North Wales | 491 | 53 | 544 | 2 694 | 3 238 |
| Wales | 700 | 568 | 1 268 | 8 580 | 9 848 |
| England and Wales | 36 521 | 10 782 | 47 303 | 71 816 | 119 120 |

(a) For aggregate use only.

(b) The figure for total consumption slightly under estimates true consumption because for some regions unallocated sales have an unknown destination. Total unallocated sales were (thousand tonnes): sand and gravel: 518; crushed rock: 1785.

(a) Including dolomite.

(d) BGS estimate.

(b) Total production, excluding marine-dredged material for export;
see table on p.74.

Source: Office for National Statistics.

(c) The following amounts of crushed rock aggregate, believed to be

mainly igneous rock, were exported (million tonnes):

2008: 5; 2009: 5; 2010: 5; 2011: 5; 2012: 4. Crushed rock aggregate is also imported in comparable amounts. These figures have not been taken into account when calculating consumption.

**Great Britain consumption of natural aggregates related to construction work
(intensity of use of aggregates) 1960–2012**

| Year | Value of new construction work (a) £ million | Estimated consumption of aggregate | | | Total value of all construction work (a) £ million | Estimated consumption of aggregate | | |
|------|---|------------------------------------|---------------------|-------|---|------------------------------------|---------------------|-------|
| | | Crushed rock | Sand and gravel (b) | Total | | Crushed rock | Sand and gravel (b) | Total |

(a) Includes small quantities for other purposes in Northern Ireland.

(b) Includes an estimate for Northern Ireland.

(c) For a number of years a significant amount of armourstone imports are believed to be wrongly classified as 'granite, crude'. Care should be taken when comparing long time trends.

**Great Britain production of crushed rock by end-use 2012
(total production 82.9 million tonnes)**

Great Britain production of crushed rock by region 1980–2012

Thousand tonnes

Source: Iron and Steel Statistics Bureau.

This table shows the consumption of fluxes used in iron and steelmaking. Dolomite and limestone are used in blast furnaces and in sinter plants, whilst lime and calcined dolomite, or dolime, are used in steelmaking. These figures do not entirely agree with those shown elsewhere for the production of limestone, dolomite and chalk for iron and steelmaking, even allowing for the conversion of lime and dolime to carbonate.

Great Britain production of dolomite (a) by end-use 2000–2012

Thousand tonnes

| Year | Building stone | Constructional use | Agricultural use (b) | Other uses (b) | Total |
