

The type Ludlow Series: Holostratigraphy

The geochronology, chronostratigraphy, lithostratigraphy and biostratigraphy of the type Ludlow Series are collated on a single correlation chart. The combined use of the various biostratigraphical methods of correlation produces a holostratigraphy, with 33 separate holostratigraphical events being recognized.

[Holostratigraphical chart provides a link to the correlation chart.](#)

[Holostratigraphical events provides a link to a definition and description of each event.](#)

There are further links from the correlation chart to the definition and description of events.
