*The full range of Survey publications is available from the BGS Sales Desks at Nottingham, Edinburgh and London; see contact details above or shop online at [www.geologyshop.com](http://www.geologyshop.com)*

*The London Office also maintains a reference collection of BGS publications, including maps, for consultation.*

*The Survey publishes an annual catalogue of its maps and other publications; this catalogue is available from any of the BGS Sales Desks.*

*The British Geological Survey carries out the geological survey of Great Britain and Northern Ireland (the latter as an agency service for the government of Northern Ireland), and of the surrounding continental shelf, as well as its basic research projects. It also undertakes programmes of British technical aid in geology in developing countries as arranged by the Department for International Development.*

*The British Geological Survey is a component body of the Natural Environment Research Council.*

## PREFACE

Welcome to the latest edition of World Mineral Production, which includes global mineral production data for 2015 and is a continuation of the dataset that began in 1913.

This publication is compiled from a comprehensive database, maintained by the British Geological Survey, through which we aim to provide a reliable, comprehensive and continuous set of data covering most of the minerals that enter international trade. In this volume we have set out the production figures by country for more than 70 mineral commodities, over the five-year period from 2011 to 2015. The objective of this series remains to present the latest production information obtained from official bodies in individual countries, although other sources are also used to ensure completeness and accuracy. The cooperation afforded to the British Geological Survey by numerous national and international organisations is gratefully acknowledged.

The production statistics in this latest volume reveal that for most minerals production in 2015 was broadly similar to 2014, with the world totals for the majority of mineral commodities increasing or decreasing by less than 10 per cent. There are exceptions, of course. For example the mine production of platinum group metals increased by nearly 22 per cent in 2015 compared to 2014, more than reversing the fall in 2014 compared to 2013. This is almost entirely due to production levels in South Africa returning to more typical levels following the challenges experienced there in 2014. However, global output is still seven per cent lower in 2015 than it was in 2011 and the World Platinum Council reported that the market remained in deficit.

Other notable production increases in 2015 compared to 2014 are mined bismuth (up 16 per cent), bauxite (up 13 per cent), bentonite (up 11 per cent) and mined cobalt (up 10 per cent). The increase in mined bismuth is largely due to a new mine opening in Vietnam. The increase in bauxite is predominantly due to a significant increase in output from Malaysia which has more than offset the continued decline in production from Indonesia following the ban on exports from the latter. However, we are expecting a notable change in this position for 2016 because Malaysia has instigated its own restrictions on bauxite mining as a result of environmental issues associated with this higher production.

Mineral commodities with notable reductions in global production in 2015 compared to 2014 include mined antimony (down 18 per cent), barytes (down 10 per cent), asbestos (down 20 per cent) and bromine (down 11 per cent). For each of these, a large part of the decrease is due to reductions in a single country: for example, in China mine production of antimony fell by 21 per cent in 2015 compared to 2014 and barytes by 27 per cent. Asbestos production in Russia and bromine production in Israel both declined by 33 per cent. It can often be difficult to determine the exact cause of declining production levels such as these.

Concern surrounding the worldwide security of supply of minerals, which has been evident for a few years now, continues. Particular interest focusses on the so called 'critical' minerals, i.e. those elements that are essential for new and/or green technologies. New policies and programmes of supporting research have continued to be developed across the entire worldwide supply chain, with the common aims of diversifying the supply base, improving resource efficiency (which includes, but is not limited to, recycling), and developing alternatives for the most constrained elements both in terms of substituting materials and other technologies.

During the past year, the BGS has been part of the consortium that is preparing the next update of the European commission's list of critical raw materials and the final results are expected to be published later in 2017. In addition, BGS continues to be involved with several materials-related research projects including: the European rare earth element project (EURARE; [www.eurare.eu](http://www.eurare.eu)); Blue Mining ([www.bluemining.com](http://www.bluemining.com)), which is focussed on sustainable deep sea mining; and Mineral Intelligence Capacity Analysis (MICA; <http://mica.eurogeosurveys.org/>). New projects in this research area, which have just commenced, include: Solution for Critical Raw Materials – a European Expert Network (SCRREEN; <http://scrreen.eu/>) and Global Material Flows and Demand-Supply Forecasting for Mineral Strategies (MinFuture).

As always, I would welcome any comments and suggestions that you have relating to this volume which might help us to meet your ongoing needs.

John N Ludden

## CONTENTS

### Commodity Index

Alumina 3	Manganese 47
Aluminium 4	Mercury 48
Antimony 5	Mica 49
Arsenic 5	Molybdenum 50
Asbestos 6	Natural gas 56
Barytes 7	Natural sodium carbonate 67
Bauxite 2	Nepheline syenite 50
Bentonite 8	Nickel 51
Beryl 10	Niobium 72
Bismuth 11	Perlite 53
Borates 11	Petroleum 54
Bromine 12	Phosphates 58
Cadmium 12	Platinum 59
Chromium 13	Potash 60
Coal 14	Pyrites 67
Cobalt 17	Rare earths 61
Copper 19	Rhenium 61
Diamond 22	Salt 62
Diatomite 23	Selenium 64
Feldspar 24	Silicon 37
Ferro alloys 37	Sillimanite 65
Fluorspar 25	Silver 65
Fuller's earth 8	Strontium 67
Gallium 26	Sulphur 67
Germanium 26	Talc 71
Gold 27	Tantalum 72
Graphite 29	Tellurium 73
Gypsum 30	Tin 74
Indium 32	Titanium 75
Iodine 32	Tungsten 77
Iron ore 32	Uranium 78
Iron and steel 34	Vanadium 78
Kaolin 40	Vermiculite 79
Lead 42	Wollastonite 79
Lithium 44	Zinc 80
Magnesite 45	Zirconium 82
Magnesium 46	

## APPENDIX

### Tables relating to Europe only

Aggregates 84
Cement 86

## EXPLANATORY NOTES

### Coverage

*World Mineral Production* covers the majority of economically important mineral commodities. For each commodity constant efforts are made to ensure that as many producing countries as possible are reported. For some commodities, where statistics on production are not publicly available, estimates are made. Users of this compilation are advised that more statistical information than can be included in a publication of this nature is held in the British Geological Survey files and is available for consultation. Historical data (from 1913 for many commodities) can be obtained from the predecessors to this series entitled *World Mineral Statistics* and the *Statistical Summary of the Mineral Industry*. Copies of these publications are available in the World Archive section of the website: [www.mineralsUK.com](http://www.mineralsUK.com).

### Arrangement of countries

Countries are ordered alphabetically in geographical groupings as follows:

Europe  
Africa  
North and Central America, including the Caribbean  
South America  
Asia  
Australasia, including the Pacific Islands

### Metals

Mine production of many metals is expressed in terms of metal content. This is clearly indicated at the head of the table, adjacent to the unit used. For aluminium, cobalt, copper, iron, lead, nickel, tin and zinc, mine production and metal production are shown in separate tables. Unless otherwise specified, metal production statistics relate to metal recovered from both domestic and imported materials, whether primary or secondary, but exclude remelted material wherever possible.

### World totals

For certain minerals and metals no world total is shown due to the non-availability of certain individual country totals.

### Exclusion of Warranty

Use by recipients of information provided by the BGS, is at the recipients' own risk. BGS has taken care to ensure that information provided is as free from error as is reasonably practical. In view of the disparate sources of information at BGS's disposal, including such material donated to BGS, that BGS accepts in good faith as being accurate, the Natural Environment Research Council (NERC) gives no warranty, expressed or implied, as to the quality, accuracy, performance, and merchantability of the information supplied, or to the information's suitability for any use whether made known to BGS or otherwise. NERC/BGS accepts no liability whatever in respect of loss, damage, injury or other occurrence however caused.

### Acknowledgements

Compilation of this volume of mineral statistics has been possible only by obtaining information from a very large number of organisations throughout the world, chiefly home and overseas government departments and specialist national or international authorities concerned with particular sectors of the minerals or metals industries. To all these bodies the British Geological Survey expresses its grateful acknowledgement for the information made available, whether

in published form or provided by direct correspondence. Particular acknowledgement is made to the Mines Departments and other government agencies of many countries whose regular statements, yearbooks and other reports are worthy of direct consultations by readers in search of detail.

Specialist commodity organisations which have kindly allowed information to be reproduced include the International Copper Study Group, the International Lead and Zinc Study Group, the International Nickel Study Group, the Barytes Association and the International Fertilizer Industry Association Ltd. In a few instances, information on specific commodities has been obtained directly from company sources. The co-operation of other members of the International Consultative Group on Non-Ferrous Metal Statistics is also gratefully acknowledged.

Supplementary information is also obtained from publications dealing with a wider range of commodities such as Société de l'Industrie Minérale, *Annuaire Statistique Mondial des Minéraux et Métaux*; World Bureau of Metal Statistics, *World Metal Statistics* and, *Metalstatistik*; publications of the Interstate Statistical Committee of the CIS, the United States Geological Survey, and UN agencies.

In addition, information has been obtained from the websites of the following organisations, companies, statistical offices and government departments: United Nations; BP Plc; Eurofer; Eurostat; Instituto Latinoamericano del Fierro y el Acero; International Iron and Steel Institute; Kaolin & Plastic Clays Europe; Kimberley Process; World Nuclear Association; African Development Bank; UEPG; Agnico Eagle Mines; Altyntau; Anglo American; AngloGold Ashanti; ARMZ; Aura Minerals Inc; Avocet Mining Plc; Belvedere Resources; BHP Biliton; Boliden Metal Producers; Breakwater Resources; Centamin; Centerra Gold; Consolidated Murchison; CZP; Dominion Salt; Dragon Mining; Dundee Precious Metals; Eagle Graphite; ElektroZinc; Endeavour Mining; Endomines; Eurasian Natural Resources Corporation; Evraz; First Quantum; Galaxy Resources; Gemfields Plc; Glencore Xstrata; GoldBridges; Gravita; Hudson Resources Ltd; Iamgold Corporation; Inmet Mining; IRC Group; KAZ Minerals; Kazakhmys; Kazzinc; Kenmare Resources Plc; Lappland Goldminers; Lundin Mining; Lynas Corporation; Mandalay Resources; Minerals and Metals Group; Nevsun Resources; Nickel Asia; Nordgold; Norsk Hydro; Nyrstar; Orvara Minerals; Outokumpu; Paladin Energy Ltd; PanAust Mining; Phosagro; Phosphate Resources Ltd; Polymetal International; Qatalum; Qatar Steel Company; RandGold Resources; Resolute Mining; Rich Metal Group; Rio Tinto; Ronphos Corporation; UC Rusal; Semafo; Sherritt International; SMR; SMZ company; South 32; Sun-gold; Talvivaara; Teranga Gold Corp; TiZir; UMMC; Uralkali; Vitmetco; Weatherly International Plc; Wolf Minerals; Aluar Aluminio Argentino, Argentina; Alumbrra, Argentina; Institute of Argentinean Petroleum and Gas, Argentina; Acero Argentinos; Department of Natural Resources and Mines Queensland, Australia; Northern Territory Government, Australia; Department of Primary Industries Victoria, Australia; Mineral Resources Tasmania, Australia; Tasmania Mines Ltd; Australia; NWS Department of Primary Industries, Australia; Bureau of Resources and Energy Economics, Australia; Department of Mines and Petroleum, Western Australia; Grafitbergbau-Kaisersberg, Austria; Vereinigung der Österreichischen Zementindustrie, Austria; Department of Statistics of the Bahamas; Petrobangla, Bangladesh; Central Bank of Barbados; Federation de l'Industrie Cimentiere Belge, Belgium; Belgian Steel Federation; Statistics Belgium; Aluminium Bahrain; National Statistical Committee, Belarus;

### *Units*

The Statistics shown in this volume are expressed in metric units. The following factors are given for converting to non-metric units:

tonnes  $\times 0.9842$  = long tons

tonnes  $\times 1.1023$  = short tons

kilograms  $\times 2.2046$  = pounds

kilograms  $\times 32.1507$  = troy ounces

cubic metres  $\times 35.3147$  = cubic feet

1 tonne of crude petroleum equals on average 7 barrels of crude petroleum.

1 flask mercury = 34.5 kilograms

World total fuller's earth (a)	3 100 000	3 300 000	3 400 000	3 200 000	3 300 000

See notes on following page

## Production of bentonite and fuller's earth

### Note(s)

- (1) Bentonites consist of montmorillonite (one of the smectite group of clay minerals) and occur in two main varieties, calcium bentonite, the most commonly occurring, and sodium bentonite, industrially the more important
  - (2) Calcium bentonite can be converted to sodium bentonite by a sodium-exchange process
  - (3) In some countries, such as the United Kingdom, calcium bentonite is known as fuller's earth, a term which is also used to refer to attapulgite, a mineralogically distinct clay mineral but exhibiting similar properties
  - (4) In addition to the countries listed, Algeria, France, Iran and Japan may produce fuller's earth
- (a) Including attapulgite and sepiolite  
 (b) Years ended 30 June of that stated  
 (c) Smectite  
 (d) Sales  
 (e) Sold or used by producers  
 (f) Years ended 31 March following that stated  
 (g) Years ended 20 March following that stated

## Production of beryl

tonnes (metric)

Country	2011	2012	2013	2014	2015
Madagascar (a)	12	16	* 85	* 135	* 135
Mozambique	58	532	103	—	—
Zambia	* 5	5	5	4	7
USA (b)	5 920	5 570	5 910	6 900	5 100
China	* 550	* 500	* 500	* 500	* 500

### Note(s)

- (a) Includes ornamental and industrial products  
 (b) Includes bertrandite ore, calculated as equivalent to beryl containing 11% beryllium oxide

## Mine production of bismuth

tonnes (metal content)

Country	2011	2012	2013	2014	2015
Armenia	3	4	4	* 4	* 4
Bulgaria	—	1	3	—	—
Russia	* 45	* 45	* 45	* 45	* 45
Canada	92	121	35	3	2
Mexico	935	800	824	948	606
Bolivia	41	10	—	11	20
China	1 544	2 494	1 393	1 490	* 1 500
Japan (a)	476	446	485	582	568
Vietnam	—	—	—	646	1 510
World total	3 100	3 900	2 800	3 700	4 300

### Note(s)

- (1) The figures in this table are in some instances derived from reported bismuth content of refined and impure metal plus recoverable in ores and concentrates exported
- (2) Production for some countries may include bismuth produced from imported ores but it is thought that any resulting duplication is insignificant in the countries shown

(a) Metal production

## Production of borates

tonnes (metric)

Country	2011	2012	2013	2014	2015

### Note(s)

- (1) There is no international agreement as to the separate definition of lignite and brown coal. In some cases they are distinguished.  
Elsewhere both may be aggregated under one or other term.
- (2) Where no sub-commodity is shown the figures relate to all ranks of coal.

- (a) Spitzbergen: not including production from mines controlled by Russia
- (b) Excluding production in Kosovo
- (c) Including anthracite
- (d) Years ended 30 June of that stated
- (e) Includes a small amount of refuse recovery
- (f) Including beneficiated and directly shipped material
- (g) Years ended 31 March following that stated
- (h) Years ended 20 March following that stated
- (i) Years ended 15 July of that shown
- (j) Including lignite
- (k) Including sub-bituminous

### Note(s)

- (1) There is frequently a considerable disparity between the cobalt content of ore raised and cobalt actually recovered.
- (2) Figures in this table relate where possible to cobalt recovered. The principal exceptions to this are Brazil and New Caledonia, the figures for which relate to cobalt in ore raised.

(a) Metal and/or refined

(b) Years ended 30 June of that stated

## Production of refined cobalt

tonnes (metric)

Country	2011	2012	2013	2014	2015
Belgium (a)	3 187	4 200	5 415	5 850	6 306

World total	82 300	107 800	87 500	92 200	99 100

### Note(s)

(1) In addition to the production listed above, several countries, including the United Kingdom, are known to produce substantial amounts of cobalt compounds which are not shown here to avoid double counting.

- (a) Some refined cobalt production in China is recorded in Belgium
- (b) Excludes white alloy and matte which are believed to be further processed in Belgium and elsewhere
- (c) Includes metal and metal contained in sulphate
- (d) Including oxides

### Note(s)

- (1) Figures relate to both primary and secondary refined copper, whether electrolytic or fire refined. Metal recovered from secondary materials by remelting alone is excluded.
- (2) In addition to the countries listed, Albania and Colombia produce refined copper.

- (a) Years ended 31 March following that stated  
 (b) Years ended 20 March following that stated

### Note(s)

- (1) This table does not show production of synthetic diamond.
- (2) So far as possible the amounts shown include estimates for illegal production.
- (3) Production of diamond from Ivory Coast was under United Nations sanctions from 2004 to 2013. It is believed illegal production continued during this period but it is not possible to estimate the quantity involved.

- (a) Including artisanal production
- (b) Currently under temporary suspension by the Kimberley Process and not trading in rough diamonds; however it is unclear whether production has actually stopped
- (c) Years ended 31 March following that stated

Note(s)

- (2) In addition, the USA produced the following amounts of fluorspar equivalent in fluorosilicic acid derived from processing phosphate rock ('000 t): 2011: 124; 2012: 130; 2013: 134; 2014: 131; 2015: 114.

- (a) Years ended 30 June of that stated
- (b) Including beneficiated and directly shipped material
- (c) Years ended 31 March following that stated
- (d) Years ended 20 March following that stated

## Production of primary gallium

Accurate data for gallium is difficult to obtain because it is produced only as a by-product of bauxite or zinc processing using proprietary techniques and the majority of producers do not report production figures. The leading producing countries are believed to be China, Russia, Germany and Ukraine, with smaller quantities produced in the Republic of Korea, Hungary and Japan.

The following table provides the currently available information but this is incomplete. The United States Geological Survey estimates total world primary production as: 2011, 292 tonnes; 2012, 273 tonnes; 2013, 390 tonnes; 2014, 440 tonnes and 2015, 435 tonnes.

Lower grade production is often subsequently refined to higher grade material which complicates the collection of production data as double counting is a significant risk. High-purity gallium is believed to be produced in China, Japan, United Kingdom, U.S.A. and possibly Slovakia. There is also believed to be significant production of refined gallium from scrap recycling, particularly in Canada, Germany, Japan, United Kingdom and USA.

Japan	* 2	* 2	* 2	* 2	* 2

### Note(s)

(1) Germanium is also believed to be recovered from imported or domestic material in Belgium, Canada, Russia and Ukraine.

(a) Including production of secondary metal

## Mine production of gold

In addition to 'industrial scale' gold mines around the world, a significant quantity of gold is mined by small scale or artisanal producers, both on a legal and illegal basis. In some countries the quantities involved with artisanal mining can be relatively large. The compilation of reliable data for the quantity produced by artisanal mining in each country is difficult, particularly where the actions are illegal. Artisanal mining can be seasonal, temporary and highly variable, on both geographical and temporal scales.

Where possible, the table attempts to include estimates for artisanal mining of gold in order that the calculated World totals are as complete as possible. However, the difficulties noted above mean that these totals cannot be completely accurate and they are consequently rounded to a greater degree than the individual country figures may suggest is appropriate. This is an attempt to convey the level of uncertainty associated with these total figures.

For clarity, additional comments on specific countries are shown below (there may be other countries where artisanal mining also occurs; these comments are not intended to be exhaustive):-

Burkina Faso – official Chamber of Mines figures include 302 kg for artisanal mining in 2015; 208 kg in 2014; and 476 kg in 2013. It is believed the actual artisanal production may be higher.

Cameroon – all gold mining is currently small scale or artisanal. A nominal estimate is shown in the table but it could be much higher.

Democratic Republic of Congo – artisanal mining is quite extensive, the figures shown include estimates for artisanal mining ranging from 10 000 to 17 000 kg per year.

Ghana – gold produced by artisanal mining is purchased by a state-owned marketing organisation and consequently official reported figures include this artisanal mining. It is believed that the artisanal component of these figures could be as high as 20 000 to 30 000 kg per year.

Guinea – the figures currently shown in the table are for industrial mines only. Artisanal mining does occur and is likely to be in the range of 100 to 1000 kg per year.

Ivory Coast – the figures currently shown in the table are for industrial mines only. Artisanal mining does occur but the scale is unknown.

Madagascar – estimates of artisanal mining are in the order of 3000 to 4000 kg per year.

Mali – the figures include an estimate of 5000 kg per year for artisanal mining, but it is likely the real figure varies from year to year.

Togo – the reported figures are exports of gold which is transiting through the country. It is believed the majority of this originates in Burkina Faso from artisanal mining but it is not recorded within the production figures for that country. Consequently it is recorded here for completeness. Some artisanal mining is also believed to occur in Togo.

Burma – these figures include an estimate of between 200 and 300 kg per year for artisanal mining.

## Mine production of gold

### Note(s)

- (1) In several countries substantial amounts of gold produced in small operations are not recorded in the official statistics used when compiling this table.
- (2) In addition to the countries listed, Benin, Central African Republic, Congo, Uganda and Taiwan produce less than 100 kg gold per year.
- (3) In addition to the countries listed, Cambodia, El Salvador, Haiti, Macedonia, Malawi, Pakistan, Paraguay, Portugal, and South Sudan may produce gold.

- (a) Metal production
- (b) Years ended 7 July of that stated
- (c) Includes an estimate for artisanal mining
- (d) Exports
- (e) Contained in blister copper, refinery muds and electrolytic copper
- (f) Year ended 30 November of the year stated
- (g) Years ended 31 March following that stated
- (h) Years ended 20 March following that stated

### Note(s)

(1) Some countries produce large quantities of synthetic gypsum. Where possible, this output is excluded from the table.

- (a) Including anhydrite
- (b) Excluding output from the region east of the River Nistru and the Municipality of Bender
- (c) Sales
- (d) Years ended 7 July of that stated
- (e) Years ended 31 March following that stated
- (f) Including selenite
- (g) Years ended 20 March following that stated
- (h) Years ended 30 June of that stated

## Refinery production of indium

### Note(s)

- (1) Unless otherwise indicated, these figures include production from scrap.
- (2) Small amounts of steel are believed to be produced in Sri Lanka.

- (a) Production from the region east of the River Nistru
- (b) Years ended 31 March following that stated

### Note(s)

- (1) In addition to the countries listed, Bahrain and Chile also produce ferro-chrome.
- (2) In addition to the countries listed, Saudi Arabia also produces ferro-manganese and ferro-silico-manganese.

- (a) Years ended 30 June of that stated
- (b) Years ended 31 March following that stated
- (c) Years ended 20 March following that stated
- (d) Included with 'other ferro-alloys'

### Note(s)

(1) In addition to the countries listed, Denmark is believed to produce kaolin.

- (a) Beneficiated
- (b) Washed and dried
- (c) Washed
- (d) Years ended 7 July of that stated
- (e) Sold or used by producers
- (f) Beneficiated; excludes directly used natural kaolin
- (g) Years ended 31 March following that stated
- (h) Years ended 20 March following that stated
- (i) Years ended 30 June of that stated

### Note(s)

(1) In addition to the countries listed, Romania is believed to produce mica.

- (a) Including mica recovered from mica schists and/or kaolin beneficiation
- (b) Sold or used by producers
- (c) Conservative BGS estimates, based on exports
- (d) Years ended 31 March following that stated
- (e) Years ended 20 March following that stated
- (f) Mainly sericite
- (g) Sericite

## Mine production of molybdenum

tonnes (metal content)

### Note(s)

(1) The figures shown in this table include natural gas liquids.

- (a) Including oil from shale and coal
- (b) Including natural gas liquids
- (c) From oil shale
- (d) Sudan and South Sudan separated on 9 July 2011
- (e) Years ended 31 March following that stated
- (f) Including shares of production from the Neutral Zone
- (g) Years ended 30 June of that stated

### Note(s)

- (1) Wherever possible, figures relate to quantities of platinum group metals thought to be recovered from ores originating in the country stated.
- (2) Figures for metal production are only given for countries where recovery is thought to be based predominantly on domestic materials or on imported materials which have not been recorded as mine production elsewhere in the table.
- (3) In addition to the production listed, concentrates produced in Spain, and possibly other countries, are believed to be processed in China to recover platinum group metals.

- (a) Sales from mine production and stocks
- (b) Years ending 7 July of that stated
- (c) Platinum group metals; all forms

## Production of potash

China (a)	* 105 000	* 100 000	* 95 000	* 140 000	* 140 000
Malaysia	498	114	229	292	365
Vietnam	* —	* —	* 100	* 100	* 100
Australia (b)	2 188	2 612	970	3 965	8 799

### Note(s)

- (1) All the figures in this table are either reported as rare earth oxides or are calculated to rare earth oxide equivalent.
- (2) Prior to the 2005-2009 edition of this book, a table for the production of 'rare earth minerals' was included rather than the current 'rare earth oxides'. Users should exercise caution when comparing statistics over longer time periods.
- (3) Although rare earth minerals are believed to be extracted in other countries, there is insufficient evidence to estimate the quantities of contained oxides.
- (4) Where possible, data are shown against the country where the mineral is mined.

(a) Includes production from iron ore extraction, bastnasite concentrates and ion absorption clays

(b) Years ending 30 June of that stated

### Note(s)

- (1) This table does not include production of refined salt.  
(2) Salt is known to be produced in many countries for which statistics are not available.

- (a) Salt; all forms
- (b) Years ended 30 June of that stated
- (c) Years ended 7 July of that stated
- (d) Lake salt
- (e) Sea salt
- (f) Exports
- (g) Including salt in brine
- (h) Sold or used by producers
- (i) Years ended 31 March following that stated
- (j) Seasons beginning in November and ending in May of the year stated.
- (k) Years ended 20 March following that stated

## Production of refined selenium

tonnes (metric)

Country	2011	2012	2013	2014	2015
Armenia	14	17	20	* 20	* 20
Belgium	* 200	* 200	* 200	* 200	* 200
Finland	86	93	72	94	93

South Africa Andalusite	* 295 000	* 265 000	* 270 000	* 270 000	* 270 000
USA Kyanite (a)	98 000	99 000	110 000	* 110 000	* 110 000
Brazil Kyanite (b)	* 200	* 200	* 200	* 200	* 200
India Kyanite (c)	4 064	1 048	3 679	6 255	2 901
Sillimanite (c)	59 206	43 736	67 265	66 273	70 447
Nepal Kyanite (d)	25	29	19	12	7

### Note(s)

- (1) A number of other countries produce sillimanite minerals but details of output are not reported.
- (2) In addition to the countries listed above as producing sillimanite minerals, synthetic mullite is believed to be produced in Brazil, Germany and Hungary
- (3) Production capacity for synthetic mullite also exists in China, India, Japan, the USA and the United Kingdom but output is believed to be zero.

- (a) Including related minerals
- (b) Including beneficiated and directly shipped material
- (c) Years ended 31 March following that stated
- (d) Years ending 15 July of that stated

See the following page for notes

## Production of tantalum and niobium minerals

### Note(s)

- (1) Niobium and tantalum minerals are believed to be produced in Namibia and South Africa.
- (2) The figures in this table refer to gross tonnage of tantalum and niobium concentrates, except where otherwise indicated.
- (3) Tantalum is also recovered from tin slags and is believed to have accounted for approximately 20% of raw material supplied.

- (a) Years ended 7 July of that stated  
 (b) Excluding Russia

## Production of refined tellurium

tonnes (metric)

### Note(s)

- (1) The figures in this table refer to gross tonnage of titanium concentrates.
- (2) Some ilmenite is converted to synthetic rutile in Australia, India, Japan and USA.

- (a) It is believed that the majority of this is processed into slag.
- (b) Canada produces some ilmenite which is sold as such and not processed into slag, but tonnages are small
- (c) Years ended 31 March following that stated
- (d) Years ended 30 June of that stated
- (e) Including natural rutile

## Mine production of tungsten

tonnes (metal content)

Country	2011	2012	2013	2014	2015

### Note(s)

(1) In this table the term 'zirconium minerals' is understood to mean zircon, unless otherwise stated

(a) Baddeleyite concentrate

(b) Including caldasite rock containing zircon and baddeleyite

(c) Years ending 31 March following that stated

(d) Conservative BGS estimates, based on exports

(e) Years ended 30 June of that stated

### Note(s)

- (1) So far as possible, these production statistics include construction sand; gravel, pebbles, shingle and flint; crushed stone used for concrete aggregates, roadstone and other construction uses; granules, chippings and powders.
  - (2) Where official sources show more than one series for aggregates the higher series has generally been used in this compilation.
  - (3) Where marine sands and gravels have been identified, these are included.
  - (4) Information may be incomplete or absent due to reporting methods, confidentiality or lack of available information. All European countries produce sand and gravel and crushed rock.
  - (5) Production from many small operations are not officially compiled. The minimum number of employees for which establishments are required to report production varies between different countries and can also vary from year to year within a country.
  - (6) Quantities of sand from sand and gravel operations may be discarded due to low demand. This may or may not be included in the statistics.
- (a) Sales
  - (b) Includes an estimate for small producers
  - (c) Includes small quantities for other purposes in Northern Ireland
