The authors of [Stachowska-Kamińska et al. \(2022\)](#) regret that there was an error in labelling the axes in the upper panel of Fig. 5. The x and y axes should be labelled “Specimen numbers” and “Species numbers”, respectively. The corrected Fig. 5 is given below, together with its caption.

Fig. 5. Rarefaction curves (upper panel) and Chao diversity estimates (lower panel) for the total (‘live + dead’) assemblages at the three sites: C, control site; I, impacted site; R, resedimentation site
