BRITISH GEOLOGICAL SURVEY

**WORLD MINERAL STATISTICS
1987–91**

Volume 1: Metals & Energy

Production: Exports: Imports

Compiled by G J Loftus, J A Hillier, K A Linley and H R Singh
Research by C D G Black and G R Chapman

BRITISH GEOLOGICAL SURVEY
Keyworth, Nottingham NG12 5GG
0602 363100
Murchison House, West Mains Road, Edinburgh EH9 3LA
031-667 1000

The full range of Survey publications is available through the Sales Desks at Keyworth and Murchison House, Edinburgh. Selected items can be bought at the BGS London Information Office in the Natural History Museum Earth Galleries (071-589 4090), and orders are accepted here for all publications. The adjacent bookshop stocks the more popular books for sale over the counter. Most BGS books and reports are listed in HMSO's Sectional List 45, and can be bought from HMSO and through HMSO agents and retailers. Maps are listed in the BGS Map Catalogue and the Ordnance Survey's Trade Catalogue, and can be bought from Ordnance Survey agents as well as from BGS.

The British Geological Survey carries out the geological survey of Great Britain and Northern Ireland (the latter as an agency service for the government of Northern Ireland), and of the surrounding continental shelf, as well as its basic research projects. It also undertakes programmes of British technical aid in geology in developing countries as arranged by the Overseas Development Administration.

The British Geological Survey is a component body of the Natural Environment Research Council.

All communications regarding the content of this publication should be addressed to the Group Manager, Minerals Group, British Geological Survey, Keyworth, Nottingham NG12 5GG 0602 363100.

The compilations presented in this book are copyright and may not be reproduced in any form without the permission of the Director, British Geological Survey.

PREFACE

This volume is the sixteenth in the series *World Mineral Statistics*.

The first volume in this series was published in 1978 but publication by the British Geological Survey, and its precursors, of descriptive statistics encompassing the mineral industry world-wide dates back to 1913 in the well-known *Statistical Summary of the Mineral Industry*. The current volume is therefore the latest in a continuous series encompassing 79 years.

In response to the wishes of many of our subscribers, the current edition of *World Mineral Statistics* is being published in two volumes: **Metals and Energy** and **Industrial Minerals**. It is hoped that this will enable the book to serve better those with specific interests in the minerals field. A precise split between the two categories has not been possible; consequently some materials are featured in both volumes. These are bauxite, alumina, chromite, lithium minerals, rare earths and titanium minerals.

Production data for 1992 will be made available on microfiche towards the end of this year. Publication of a special production supplement is to be resumed at the same time. The first issue will contain production data for 1992. Development of a dial-up subscription service, for accessing the World Mineral Statistics database on line, is continuing.

Trends in mineral production were generally downwards from 1990 to 1991, reflecting the recession in most of the major economies.

Coal recorded in 1990, its first year-on-year fall since 1967 and the decline steepened in 1991 with world production falling by 6% to its lowest level since 1984. Petroleum production fell slightly in 1991. Natural gas remained steady.

In contrast to 1990, the production of most of the industrial minerals also fell in 1991, although barytes, kaolin, magnesite and salt resisted this trend. The production of fluorspar fell sharply partly due to the decline, for environmental reasons, in the use of chlorinated fluoro-carbons.

The mine production of most metals fell in 1991, the second annual fall since the numerous all-time peaks of 1989 but precious metals and the major base metals, copper, lead and zinc, showed increases. These were not, however, matched by similar rises in consumption and as a consequence the levels of stocks rose, in general, worldwide. In contrast to the general situation, there was a fall in reported production of base metals in the Soviet Union, but exports from that country, especially of aluminium, lead and nickel, increased markedly.

An appendix showing reconstructed trade data, which was a feature of previous volumes, has not been included this year. However, the research required to produce this data is on-going and the reconstructed figures to appear in the commodity tables where they are shown as estimates. Price and production graphics have been discontinued in this issue. It is hoped that it will be possible to re-introduce them in up-graded form in future issues.

The reader should be aware that this publication is compiled from a more comprehensive data set maintained by the staff of the Minerals Group of the British Geological Survey. Additional data such as those for value of minerals produced, for country breakdown of trade, and for trade in other minerals, are available on enquiry. Although data on consumption is not compiled, it will be evident to the reader that it is possible to calculate approximate apparent consumption of many commodities from the published data, although stock changes have to be ignored unless such information is obtainable elsewhere.

In each new volume account is taken of revisions and information received after the publication of the previous issue, so that data for every year are up-to-date as is practicable. The objective remains to present the latest complete information from primary sources, that is from individual producing and trading countries, rather than to reproduce data from compilations made by other organisations working in the same field of world mineral statistics. However, such secondary sources have been fully consulted and the cooperation afforded to the British Geological Survey by numerous national and international organisations, in particular the International Consultative Group on Non-Ferrous Metal Statistics, is gratefully acknowledged.

Many problems now surround the mineral production and trade statistics for countries of the former communist bloc, particularly where political revision has not yet been matched by reorganisation of the institutions responsible for the collection of statistics. Every effort has been made by the compilers of *World Mineral Statistics* to ensure that figures truly refer to the countries indicated but users of these volumes should take particular note of commentaries and footnotes in these cases.

The British Geological Survey continues to provide to customers a reliable, comprehensive and continuous set of data covering most of the minerals that enter international trade. In view of the political and economic changes that are taking place in several major mineral-producing countries, and the attention now given to sustainable development and other global environmental concerns, the availability of such a statistical series is vital for the intelligent analysis of the use of mineral resources. Funding constraints make the continuation of this service increasingly difficult but it is our hope that the present high standards will be maintained.

Criticisms and suggestions that might help us to meet your changing needs would be welcome.

Gold	57	Tin	147
Iron ore	63	Titanium	153
Iron and steel	67	Tungsten	159
Lead	92	Uranium	177
Lithium	100	Vanadium	164
Magnesium	176	Zinc	167

EXPLANATORY NOTES

Coverage

World Mineral Statistics: Volume 1 covers the majority of economically important, and internationally traded, metal and energy minerals. It should be noted that prior to 1992 (data to 1989) both metallic and non-metallic minerals were included in one volume of the same title. For each commodity constant efforts are made to ensure that as many producing and trading countries as possible are reported and that trade data cover all major traded forms. For some commodities, where statistics on production and trade are not publicly available, estimates are made. Users of this compilation are advised that more statistical information than can be included in a publication of this nature is in the Minerals Group files and is available for consultation. Historical data (1913–1970) can be obtained from the predecessor of this series entitled the *Statistical Summary of the Mineral Industry*.

Arrangement of countries

After the United Kingdom, if listed, countries are ordered alphabetically in geographical groupings as follows:

- European Economic Community (EEC)
- Europe other than EEC; including the Soviet Union
- Africa
- North and Central America, including the Caribbean
- South America
- Asia
- Australasia, including the Pacific Islands

So far as possible the nomenclature follows the London Diplomatic List and United Nations usage.

German Democratic Republic For 1991, the data shown against Federal Republic of Germany includes data for the former German Democratic Republic, where available.

Soviet Union This country name has been retained for 1987–91 data pending clarification of statistical sources in the CIS.

Production data

Metals Mine production of many metals is expressed in terms of metal content. This is clearly indicated at the head of the table, adjacent to the unit used. For aluminium, cobalt, copper, iron, lead, nickel, tin and zinc, mine production and metal production are shown in separate tables. Unless otherwise specified, metal production statistics relate to metal recovered from both domestic or imported materials, whether primary or secondary, but exclude remelted material.

Trade data

Federal Republic of Germany Data up to 1990 include shipments to, and purchases from the German Democratic Republic.

South Africa Import data are taken from the trade statistics of the common customs area, which includes Botswana, Lesotho, South Africa and Swaziland, and relate to this area as a whole. Where separate data are available for any of these countries they have also been shown even though this may result in some double counting.

Export data are taken from returns furnished by producers to the Department of Mineral and Energy Affairs, and may be shipments rather than actual exports.

Estimates for other South African exports, based on reconstruction from importing countries, may include material originating in any of the countries of the common customs area and so involve some double counting on tables where these are listed separately.

USA US trade statistics show trade between the US customs territory and foreign countries, but exclude trade between the US and Puerto Rico, and between the US and Guam, American Samoa and other US possessions. Also excluded is trade between any of these outlying areas, shipments from US possessions to foreign countries, and shipments for the use of the US Government in foreign countries.

General Although every effort has been made to provide comprehensive coverage of trade statistics the resulting trade compilations depend on the nature of the data available. The fact that a country is not shown as trading in a particular commodity does not necessarily imply that there is no trade in that item. The commodity may not be separately identified in the available trade statistics or may not be traded in significant quantities.

Where an estimate for a trade statistic has been reconstructed from the imports/exports or other countries, the resulting figure may be conservative, as complete coverage of world trade is seldom available.

In general, export statistics include re-exports. The distinction is only made when re-exports are recorded separately in the relevant national trade account and are deemed to be significant.

Tables showing trade in metals covered by Standard International Trade Classification (Revision 3) 689.1, 8 & 9, and 699.6 & 9 (Antimony, Bismuth, Cadmium, Chromium, Cobalt, Manganese, Molybdenum, Tantulum-Niobium, Titanium, Tungsten and Vanadium) include under the term 'metal', unwrought and wrought forms, powder, alloys, waste and scrap, unless these are separately shown. Trade tables of other metals include only unwrought forms under the term 'metal'.

Acknowledgements

Compilation of this volume of mineral statistics has been possible only by obtaining information from a very large number of organisations throughout the world, chiefly home and overseas government departments and specialist national or international authorities concerned with particular sectors of the minerals or metals industries. To all these bodies the British Geological Survey expresses its grateful acknowledgement for the information made available, whether in published form or provided by direct correspondence.

Among the numerous overseas government agencies which have provided valuable information, particular acknowledgement is made to the United States Bureau of Mines; the Department of Energy, Mines and Resources of Canada; the Australian Bureau of Agricultural and Resource Economics; the Department of Mineral and Energy Affairs of South Africa; the Indian Bureau of Mines; and the Mines Departments of other countries whose regular statements, yearbooks and other reports are worthy of direct consultation by readers in search of detail.

Specialist commodity organisations which have kindly allowed information to be reproduced include the International Lead and Zinc Study Group, the UK Iron and Steel Statistics Bureau, and the UNCTAD. In a few instances, information on specific commodities has been obtained directly from company sources.

Supplementary information is also obtained from publications dealing with a wider range of commodities such as American Bureau of Metal Statistics, *Non-ferrous Metal Data*; Annales des Mines, *Realités Industrielles*; International Mining, *Yearbook*; Metaleurop, *Annuaire Statistique*; Metallgesellschaft AG, *Metallstatistik*; Mining Journal, *Mining Annual Review*; Nuova Samim, *Metalli Non Ferrosi*; World Bureau of Metal Statistics, *World Metal Statistics*; and publications of the United Nations and its agencies.

Units

The statistics shown in this volume are expressed in metric units. The following factors are given for converting to non-metric units:

tonnes $\times 0.9842$ = long tons

tonnes $\times 1.1023$ = short tons

kilograms $\times 2.2046$ = pounds

kilograms $\times 32.1507$ = troy ounces

cubic metres $\times 35.3147$ = cubic feet

1 tonne of crude petroleum equals on average 7 barrels of crude petroleum

1 metric ton unit = 10 kilograms

1 flask mercury = 34.5 kilograms

Conversion of national currencies to pounds sterling has been made using the annual period average factors shown for each country in *International Financial Statistics* published by the International Monetary Fund.

Note(s):

- (1) Except where alumina hydrate is separately specified, national trade figures for alumina can be considered as inclusive of hydrate
- (2) In this table the term 'unwrought' aluminium corresponds to item 684.1 of the Standard International Trade Classification (Revision 3) and comprises ingots, blocks, unwrought bars, etc.
- (3) Metal traded in ferro-alloy form is included under Iron, Steel and Ferro-alloys
- (a) Including alloys
- (b) Officially described as 'Aluminium ores and concentrates' but believed to be mostly alumina
- (c) Years ended 31 March following that stated
- (d) Years ended 30 June of that stated
- (e) Imports into the Netherlands
- (f) BGS estimates, based on known imports into certain countries
- (g) Re-exports
- (h) Some material believed to come from stocks
- (i) Including scrap
- (j) Including alumina
- (k) Data for the Federal Republic of Yugoslavia only

Note(s):

- (1) Except where alumina hydrate is separately specified, national trade figures for alumina can be considered as inclusive of hydrate
- (2) In this table the term 'unwrought' aluminium corresponds to item 684.1 of the Standard International Trade Classification (Revision 3) and comprises ingots, blocks, unwrought bars, etc.
- (3) Metal traded in ferro-alloy form is included under Iron, Steel and Ferro-alloys
- (a) Including alloys
- (b) Including alloys and scrap
- (c) Years ended 31 March following that stated
- (d) Years ended 30 June of that stated
- (e) Years ended 20 March following that stated
- (f) BGS estimates, based on known exports from certain countries
- (g) Data for the Federal Republic of Yugoslavia only

World total	3 700	3 800	4 000	3 800	3 600

Note(s)

- (1) The figures in this table are in some instances derived from reported bismuth content of refined and impure metal plus recoverable bismuth in ores and concentrates exported
 - (2) Production for some countries may include bismuth produced from imported ores but it is thought that any resulting duplication is insignificant in the countries shown
 - (3) In addition to the countries listed, Belgium, Brazil, Bulgaria, German Democratic Republic and Namibia are believed to produce bismuth
- (a) Including Bi content of bullion and concentrates exported
 (b) Excluding data from August to December for the Republic of Croatia

Note(s):

- (1) There is no international agreement as to the separate definition of lignite and brown coal. In some cases they are distinguished.
Elsewhere both may be aggregated under one or other term
- (a) Including lignite
- (b) Years ended 31 March following that stated
- (c) Years ended 20 March following that stated
- (d) Not including production from mines controlled by the Soviet Union
- (e) Including beneficiated and directly shipped material
- (f) Including sub-bituminous
- (g) Including anthracite
- (h) Including anthracite and lignite
- (i) Excluding data from August to December for the Republic of Croatia

Note(s):

- (1) There is frequently a considerable disparity between the cobalt content of ore raised and cobalt actually recovered
- (2) Figures in this table relate where possible to cobalt recovered. The principal exceptions to this are Australia, Brazil and New Caledonia, the figures for which relate to cobalt in ore raised

Note(s):

(1) In addition to the production listed above, several countries, including the United Kingdom, Finland, France and USA, are known to produce substantial amounts of cobalt compounds

(a) Production not reported. Much of the metal recorded under Zaire is believed to be further processed in Belgium and elsewhere

(b) Sales

(c) Including oxides

Note(s):

- (1) In this table the term 'unwrought' copper corresponds to item 682.1 of the Standard International Trade Classification (Revision 3) and includes both unrefined (including blister) and refined copper
- (2) The term 'unwrought' as used here includes alloys unless these are separately specified. The term 'scrap' includes scrap alloys
- (a) Imports into the Netherlands
- (b) Cu content
- (c) Years ended 20 March following that stated
- (d) Years ended 30 June of that stated
- (e) Including leach cathodes
- (f) BGS estimates, based on known imports into certain countries
- (g) Years ended 31 March following that stated
- (h) Refined only
- (i) Including matte and cement
- (j) Re-exports
- (k) Data for the Federal Republic of Yugoslavia only

Note(s):

- (1) In this table the term 'unwrought' copper corresponds to item 682.1 of the Standard International Trade Classification (Revision 3) and includes both unrefined (including blister) and refined copper
- (2) The term 'unwrought' as used here includes alloys unless these are separately specified. The term 'scrap' includes scrap alloys
 - (a) BGS estimates, based on known exports from certain countries
 - (b) Including matte and cement
 - (c) Including semi-manufactures
 - (d) Cu content
 - (e) Years ended 31 March following that stated
 - (f) Including cement copper
 - (g) Years ended 30 June of that stated
 - (h) Data for the Federal Republic of Yugoslavia only

Note(s):

- (1) In several countries substantial amounts of gold produced in small operations are not recorded in the official statistics used when compiling this table
- (2) In addition to the countries listed, Bulgaria, Cameroon, Czechoslovakia, Greece, Morocco, Norway, Oman and Thailand are believed to produce gold
 - (a) Exports
 - (b) Years ended 6 July of that stated
 - (c) Contained in blister copper, refinery muds and electrolytic copper
 - (d) Metal production
 - (e) Central Bank purchases
 - (f) Excluding data from August to December for the Republic of Croatia

Note(s):

(1) The figures in this table refer to crude steel and cast semi-manufactures
are not included

(a) Including recovery from scrap

(b) Years ended 30 June of that stated

(c) Excluding data from August to December for the Republic of Croatia

Note(s):

(1) In this table the term 'ingots, blooms, billets' corresponds to items 672.4,6,7 and 8 of the Standard International Trade Classification (Revision 3) which includes those of alloy and high carbon steel

- (a) Excluding ferro-molybdenum and ferro-vanadium
- (b) Re-exports
- (c) Included with 'other ferro-alloys'
- (d) Years ended 31 March following that stated
- (e) Years ended 30 June of that stated
- (f) BGS estimates, based on known imports into certain countries
- (g) Data for the Federal Republic of Yugoslavia only
- (h) Data for the Russian Federation only
- (i) Including ferro-silico-chrome

Note(s):

(1) In this table the term 'ingots, blooms, billets' corresponds to items 672.4,6,7 and 8 of the Standard International Trade Classification (Revision 3) which includes those of alloy and high carbon steel

- (a) Years ended 30 June of that stated
- (b) Data for the Federal Republic of Yugoslavia only
- (c) Including powder
- (d) Included with 'other ferro-alloys'
- (e) Years ended 31 March following that stated
- (f) Years ended 20 March following that stated
- (g) BGS estimates, based on known exports from certain countries

Note(s):

- (1) In this table the term 'unwrought' lead corresponds to item 685.1 of the Standard International Trade Classification (Revision 3) and comprises base bullion, pigs, unwrought bars, etc.

- (a) Including alloys
- (b) Pb content
- (c) Years ended 20 March following that stated
- (d) Years ended 31 March following that stated
- (e) Complex lead-zinc ore
- (f) BGS estimates, based on known imports into certain countries
- (g) Including Pb content of zinc concentrates
- (h) Years ended 30 June of that stated
- (i) Data for the Federal Republic of Yugoslavia only

Note(s):

(1) In this table the term 'unwrought' lead corresponds to item 685.1 of the Standard International Trade Classification (Revision 3) and comprises base bullion, pigs, unwrought bars, etc.

(a) Including alloys

(b) Pb content

(c) Years ended 31 March following that stated

(d) Years ended 20 March following that stated

(e) Years ended 30 June of that stated

(f) BGS estimates, based on known exports from certain countries

(g) Including Pb content of zinc concentrates

(h) Data for the Federal Republic of Yugoslavia only

Note(s):

(1) Estimated average manganese content is given in parentheses for each country, relating where possible to the later years

(2) In addition to the countries listed, Colombia, Cuba and Vietnam are believed to produce manganese ore

- (a) Shipments of manganiferous iron ore only
- (b) Including beneficiated and direct shipping ore
- (c) Including ore grading 54% to less than 35% Mn
- (d) Manganiferous iron ore
- (e) Mn content of domestic iron ore
- (f) Years ended 20 March following that stated

Note(s):

- (1) In this table the term 'unwrought' nickel corresponds to item 683.1 of the Standard International Trade Classification (Revision 3) which excludes all electro-plating anodes
 - (2) Metal traded in ferro-alloy form is included under Iron, Steel and Ferro-alloys
- (a) Including alloys
 - (b) BGS estimates, based on known imports into certain countries
 - (c) Ni content
 - (d) BGS estimates; unwrought metal and Ni content of ores, concentrates, matte etc., based on known imports into certain countries
 - (e) Ni-Co content (mainly nickel)
 - (f) Re-exports
 - (g) Including mattes, sinters etc.
 - (h) Years ended 30 June of that stated
 - (i) Data for the Federal Republic of Yugoslavia only

Note(s):

- (1) The figures shown in this table exclude natural gasoline
- (a) Including oil from shale and coal
 - (b) Petroleum condensate
 - (c) Neutral zone of Kuwait and Saudi Arabia
 - (d) Years ended 31 March following that stated
 - (e) Sales
 - (f) Excluding data from August to December for the Republic of Croatia
 - (g) Yemen Arab Republic and People's Dem. Rep. of Yemen were unified on 22 May 1990 as the Republic of Yemen

Note(s):

- (1) Wherever possible, figures relate to quantities of platinum group metals thought to be recovered from ores originating in the country stated
- (2) Figures for metal production are only given for countries where recovery is thought to be based predominantly on domestic materials or on imported materials which have not been recorded as mine production elsewhere in the table
- (3) In addition to the countries listed, Bulgaria, China, Indonesia, Papua New Guinea and Philippines are believed to produce platinum group metals
 - (a) Metal production
 - (b) Platinum metals content of concentrates (produced from Ni-Cu ores), residues and matte exported
 - (c) Years ended 6 July of that stated
 - (d) Excluding data from August to December for the Republic of Croatia

Note(s):

- (1) In this table the term 'Platinum' and/or 'Platinum metals' includes unwrought, partly worked and alloys
- (a) Years ended 31 March following that stated
- (b) Years ended 30 June of that stated
- (c) Derived from Canadian ores and concentrates exported for treatment
- (d) Platinum metals content
- (e) BGS estimates, based on known exports from certain countries
- (f) Years ended 20 March following that stated
- (g) Data for the Federal Republic of Yugoslavia only

Monazite	12 813	10 897	13 000	6 000	6 000
World total (c)	82 200	94 800	104 500	89 400	75 600
World total (REO content)	* 49 300	* 56 800	* 62 600	* 53 500	* 45 300

Note(s):

- (1) With the exception of the data for the Soviet Union, USA and China, figures in this table refer to gross tonnage of rare earth concentrates
(2) Rare earth minerals are believed to be produced, on a small scale, in Indonesia, Democratic P.R. of Korea and Mozambique

- (a) REO content. Assumed to be 60% of concentrates produced
(b) Nominal capacity
(c) Expressed as grossed up weight of concentrates produced
(d) Years ended 31 March following that stated

Note(s):

- (1) Niobium and tantalum minerals are believed to be produced also in the Soviet Union and China, and minor quantities in Argentina, Burundi, French Guiana and Zambia
- (2) The figures in this table refer to gross tonnage of tantalum and niobium concentrates
- (3) Estimated average niobium and tantalum contents are given in the form (Nb%, Ta%) for each country and each mineral, relating where possible to the later years
- (4) Niobium and tantalum are also recovered from tin slags. This source is particularly important in the case of tantalum and in recent years is believed to have accounted for over 60% of all tantalum recovered
- (5) No detailed information on the production of tantalum bearing tin slags is available but the major producers are Thailand and Malaysia, with small amounts from Australia, Brazil, Nigeria, Portugal, South Africa and Zaire

Note(s):

(1) The figures in this table refer to gross tonnage of titanium concentrates

(2) Some ilmenite is converted to synthetic rutile in Australia, India, Japan, Taiwan and USA

(a) Canada produces some ilmenite which is sold as such and not processed into slag, but tonnages are small

(b) Processed into slag. In 1991 Canada produced 701 000 tonnes (80% TiO₂)

(c) Ti content of titanium minerals and slag

of which: Re-exports	28	10	43	17	10
Thailand					
Tungsten ore	1 179	1 069	864	590	840
Australia					
Wolframite ores & concentrates	146	3
Scheelite ores & concentrates	1 909	2 202	(d) 1 887	(d) 1 810	(d) 1 272

Note(s):

(1) Significant amounts of tungsten are traded in the forms of ammonium paratungstate (APT) and carbide. Though statistics are included where available, most countries do not separately distinguish these forms in their trade accounts

(2) Metal traded in ferro-alloy form is included under Iron, Steel and Ferro-alloys

(a) W content

(b) Years ended 31 March following that stated

(c) Re-exports

(d) Including wolframite ores and concentrates

Note(s):

(1) In this table the term 'unwrought' zinc corresponds to item 686.1 of the Standard International Trade Classification (Revision 3) and comprises blocks, pigs, slabs, etc.

- (a) Including alloys
- (b) BGS estimates, based on known imports into certain countries
- (c) Zn content
- (d) Years ended 20 March following that stated
- (e) Years ended 31 March following that stated
- (f) Years ended 30 June of that stated
- (g) Data for the Federal Republic of Yugoslavia only

Zinc

tonnes

Imports of Zinc

Country	1987	1988	1989	1990	1991
Australia					
Ores & concentrates (f)	26 318	...	20 359	32 295	23 767
New Zealand (f)					
Unwrought (a)	20 403	17 061	19 148	25 550	17 428

Note(s):

- (1) In this table the term 'unwrought' zinc corresponds to item 686.1 of the Standard International Trade Classification (Revision 3) and comprises blocks, pigs, slabs, etc.
- (a) Including alloys
 (b) Including scrap
 (c) Zn content
 (d) Years ended 31 March following that stated
 (e) Years ended 20 March following that stated
 (f) Years ended 30 June of that stated
 (g) Including semi-manufactures
 (h) BGS estimates, based on known exports from certain countries
 (i) Data for the Federal Republic of Yugoslavia only
 (j) Data for the Russian Federation only

Other Mineral Commodities

Production of Germanium Metal

tonnes

Country	1987	1988	1989	1990	1991
Austria	7	6	6	5	—
Soviet Union	* 11	* 12	* 12	* 12	* 15
USA (a)	* 25	* 21	* 20	* 18	* 15
China	* 6	* 6	* 6	* 10	* 10
Japan	5	4	3	3	3

Note(s):

(1) Significant quantities of germanium are also believed to be recovered from imported or domestic material in Belgium, France, Federal Republic of Germany and to a lesser extent in Italy

(a) Including production of secondary metal

Production of Primary Magnesium Metal

tonnes

Country	1987	1988	1989	1990	1991
France	13 605	13 776	14 600	14 600	14 000
Italy	7 626	5 589	5 768	5 937	3 919
Norway	56 853	50 317	52 872	48 222	44 300
Soviet Union	* 86 000	* 90 000	* 85 000	* 90 000	* 85 000
Yugoslavia	5 932	6 176	6 106	5 788	(a) 5 360
Canada	9 373	8 000	7 200	26 726	35 500
USA	124 396	141 983	152 066	139 333	131 288
Brazil	5 488	5 866	5 613	8 700	7 800
China	* 3 000	* 3 200	3 658	5 900	6 000
Japan	8 180	9 012	12 075	12 843	11 559

(a) Excluding data from August to December for the Republic of Croatia

Production of Selenium Metal

tonnes

Country	1987	1988	1989	1990	1991
Belgium	* 230	* 250	* 250	* 250	* 250
Germany, Federal Republic of	* 100	* 100	* 100	* 110	* 110
Finland	20	24	27	37	37
German Democratic Republic	* 25	* 25	—
Sweden	31	20	23	29	* 25
Yugoslavia	66	61	55	59	(b) 64
Zambia	27	24	21	23	22
Canada	430	321	213	389	227
Mexico	29	13	20	12	3
USA	227	286	253	287	260
Chile (a)	46	30	52	37	66
Peru	11	5	9	9	13
Japan	481	471	471	495	537

Note(s):

(1) In addition to the countries listed, India, and Soviet Union are believed to produce selenium metal

(a) Exports

(b) Excluding data from August to December for the Republic of Croatia

Production of Tellurium Metal

tonnes

Country	1987	1988	1989	1990	1991
Canada	13	19	8	12	16
USA	42	53	69	36	50
Peru	7	4	8	8	14
Japan	53	55	51	50	57

Note(s):

- (1) In addition to the countries listed, Australia, Federal Republic of Germany and Soviet Union are believed to produce tellurium metal

Mine Production of Uranium

tonnes (metal content)

Country	1987	1988	1989	1990	1991
Belgium	54	50	51	45	45
France	3 376	3 370	3 334	2 935	2 479
Portugal	126	142	129	111	9
Spain	223	228	228	164	195
Soviet Union	* 10 500	* 10 500
Yugoslavia	70	79	85	* 50	* 50
Gabon	794	930	890	709	678
Namibia	3 540	3 510	3 186	3 325	2 450
Niger	2 968	2 962	2 980	2 832	2 964
South Africa	3 965	3 886	2 931	2 438	1 725
Canada	12 437	12 461	11 427	8 770	8 161
USA	5 000	5 051	5 308	3 430	3 040
Argentina	95	142	52	9	21
Brazil	104	15	30	35	* 30
India	127	* 120	* 210	* 210	* 200
Australia	3 780	3 532	3 800	3 530	3 776
World total	46 700	46 500	45 100	39 100	36 300
World total (U_3O_8 equivalent)	55 100	54 800	53 300	46 100	42 900

Note(s):

- (1) In addition to the countries listed, China, Czechoslovakia, Israel and Japan are believed to produce uranium

The logo for the Natural Environment Research Council (NERC) features a stylized black cross-like shape composed of three diagonal lines forming a triangle. To the right of the shape, the word "Natural" is written vertically in a bold, sans-serif font. Below it, "Environment" is written in a slightly smaller font. To the left of the shape, "Research" is written vertically, and below it, "Council" is written horizontally.

**Environmental
Research
Council**
