EXPLANATORY NOTES

(1) Although the statistics in this volume attempt to cover the world, it has not been possible to give complete information for some countries, especially those of eastern Europe, but in order that world totals may be arrived at, estimates for such countries have been included wherever possible.

(2) Both British and Foreign Countries are arranged alphabetically according to continents in the following order:—Europe, Africa, North and Central America, South America, Asia, Australasia.

(3) In the sections on copper, lead, tin and zinc, tables are given showing production of both ore and metal. The ore tables give the estimated metal content of ore produced. In some cases this figure has been obtained by the use of an average assay value, in others it represents the amount of metal actually recoverable. The ore is not necessarily smelted in the country of origin. It follows, therefore, that in the metal table, the metal production for a particular country may be derived from both domestic and imported ores. Secondary metal is excluded as far as possible, but where important is shown as a footnote to the producing country.

(4) Except where otherwise stated the trade figures are intended to represent imports retained, i.e., total imports less re-exports, and exports of domestic produce. In some cases, however, a certain amount of "nationalised" goods is included with domestic exports, namely goods originally imported, but which, if dutiable, have been charged with duty and subsequently re-exported. Where re-exports are not available, an indication to this effect is made by a footnote "total imports". Goods imported for "improvement" and re-exports after "improvement" are also generally included.

(5) Figures of imports and exports for certain countries are not shown. This does not necessarily mean that there is no trade in the commodity but that the item is not recorded separately in the trade returns of the country concerned. In some cases figures have been arrived at by other means, as indicated by footnotes.

(6) Fuel for bunkering, which constitutes an important part of the trade of some countries, e.g., Aden, has been shown separately although in most countries where there is bunker trade the coal or oil is not produced locally. In these cases the figures given in the import tables are total imports less re-exports other than foreign fuel shipped in bunkers. Footnotes indicate that these imports include fuel intended for bunkering purposes and that the amount of foreign fuel shipped for this purpose can be obtained from the export tables. Thus, in order to ascertain the amount of imports retained the quantity of fuel of foreign origin exported for bunkering should be deducted from the figures shown in the import tables.

(7) Trade statistics for Malaya relate to the Colony of Singapore and the Federation of Malaya. Trade between the two countries is not included. Production statistics relate to the Federation of Malaya.

(8) Production statistics for Swaziland and Bechuanaland are recorded separately but the foreign trade is dealt with for Customs purposes as part of the Union of South Africa.

(9) Trade statistics for India and Pakistan relate to sea and air-borne trade only unless otherwise stated.

(10) The factors used for converting volumes of liquids into long tons are approximate only. They are shown as footnotes to the tables relating to Coal by-products and Petroleum and Allied Products.

(11) Figures for the latest year are very often preliminary and therefore subject to revision.

(12) The units of quantity adopted are the cwt. of 112 lb. (avdp.); ton of 2,240 lb. (avdp); imperial gallon and metric carat. For precious metals the troy ounce of 480 grains is used. The symbol "—" means Nil or less than half the unit shown.

Complex ores containing cobalt are produced in Greece, China and Korea, but figures are not available.

(a) Information not available.

(b) Metal recovered from smelter products plus cobalt contained in cobalt ores and residues exported.

(c) The greater part of the 1948 production was shipments from stockpiles of ores mined in earlier years.

(d) Estimated cobalt content of cobalt oxide.

(b) Years ended June 30 of that stated.

(c) January to October only.

(d) Figures up to and including 1951 relate to diamonds of mixed African origin, including South African diamonds, the proportion of which is unknown. The comparable figure for 1952 was 4,491,207 carats valued £17,710,235. Figures for 1952 and 1953 relate to known South African produce only.

(e) In addition 5,519 carats with an estimated value of £258,087 have not yet been classified.

(f) Revised.

- (a) Information not available.
- (b) Declared imports represent a very small proportion of actual imports. These figures, therefore, represent exports of rough diamonds from the Union of South Africa, South West Africa, Gold Coast, Sierra Leone, Tanganyika, Angola and Belgian Congo to the United Kingdom as recorded by those countries. In the case of the Union of South Africa, diamonds of other African origin may be included. A certain amount of duplication is, therefore, unavoidable. No figures are available as to the quantities re-exported from the United Kingdom.
- (c) Excess of re-exports by value only. In 1950 total imports amounted to 16,620,678 carats valued £7,148,360 and re-exports to 11,722,911 carats valued £9,410,995. In 1951 total imports amounted to 13,030,077 carats valued £6,248,213 and re-exports to 11,924,024 carats valued £14,426,085. In 1952 total imports amounted to 12,815,782 carats valued £10,220,249 and re-exports to 6,134,257 carats valued £16,818,492.
- (d) Excess of re-exports.
- (e) Years ended June 30 of that stated.
- (f) Total imports. Re-exports amounted to 64,681 carats valued £ A. 53,078.
- (g) Total imports. Re-exports, which are very large, are not available. E.g. see footnote (c) for previous years.

*This table refers to the more important products obtained and does not include in some cases items classified as "other products". It follows, therefore, that the sum of the products shown for a particular country does not necessarily represent the total refinery products produced.

(a) Information not available.

(b) Including the amounts used at the refineries except in 1953. In the case of Fuel oil these amounts are shown separately.

(c) British Protected State.

(d) Including distillation plants.
