This publication continues under a slightly different title the well-known series of Statistical Summaries hitherto published for the Imperial Institute under the title of "The Mineral Industry of the British Empire and Foreign Countries." It is now prepared by the Statistical Section of the Mineral Resources Division of Colonial Geological Surveys which was transferred from the Imperial Institute to the Colonial Office in April, 1949.

The format and arrangement of contents of the Summary have not been altered, and, as in the case of the two preceding issues, the statistics cover a seven-year period.

All communications should be addressed to :—

EXPLANATORY NOTES

(1) Although the statistics in this volume attempt to cover the world, it has not been possible to give complete information for some countries, especially those of eastern Europe, but in order that world totals may be arrived at, estimates for such countries have been included.

(2) In the sections on copper, lead and zinc, tables are given showing production of both ore and metal. The ore tables give the estimated metal content of ore produced. In some cases this figure has been obtained by the use of an average assay value, in others it represents the amount of metal actually recoverable. The ore is not necessarily smelted in the country of origin. It follows, therefore, that in the metal table, the metal production for a particular country may be derived from both domestic and imported ores. Secondary metal is excluded as far as possible, but where important is shown as a footnote to the producing country.

(3) Except where otherwise stated the trade figures are intended to represent imports retained, *i.e.*, total imports less re-exports, and exports of domestic produce. In some cases, however, a certain amount of "nationalised" goods is included with domestic exports, namely goods originally imported, but which, if dutiable, have been charged with duty and subsequently re-exported. Where re-exports are not available, an indication to this effect is made by a footnote "total imports." Goods imported for "improvement" and re-exports after "improvement" are also generally included.

(4) Fuel for bunkering, which constitutes an important part of the trade of some countries, *e.g.*, Aden, has been shown separately although in most countries where there is bunker trade the coal or oil is not produced locally. In these cases the figures given in the import tables are total imports less re-exports (not including fuel shipped in bunkers). Footnotes indicate that these imports include fuel intended for bunkering purposes and that the amount of foreign fuel shipped for this purpose can be obtained from the export tables. Thus, in order to ascertain the amount of retained imports the quantity of fuel of foreign origin exported for bunkering should be deducted from the figures shown in the import tables.

(5) Production statistics for India include those of Pakistan prior to the year 1947. With effect from August, 1947, the direct foreign trade of Pakistan is excluded from that of India as also is the sea-borne trade of India with Pakistan up to March, 1948, when the trade between the two countries is recorded in the Indian returns. Separate trade statistics for Pakistan are not yet available.

(6) Trade statistics for Malaya relate to the Colony of Singapore and the Federation of Malaya. Trade between the two colonies is not included. Production statistics relate to the Federation of Malaya.

(7) The Irish Republic, formerly known as Eire is no longer included under British Countries, but for convenience is put separately between British and Foreign Countries.

(8) Burma is included with Foreign Countries in 1948.

(9) Production statistics for the French Zone of Germany include the Saar. The trade statistics for France, however, include those of the Saar from April 1, 1948.

(10) The units of quantity adopted are the cwt. of 112 lb. (avdp.); ton of 2,240 lb. (avdp.); imperial gallon and metric carat. For precious metals the troy ounce of 480 grains is used.

Antimony ore is also produced in the U.S.S.R. and Yugoslavia.

(a) Information not available.

(b) Revised.

(c) The following figures represent metal recovered as a by-product from flue dust up to and including 1944 and the antimony content of antimonial lead from 1945 (long tons): 1942—1,358; 1943—497; 1944—865; 1945—745; 1946—287; 1947—513; 1948—138.

(d) Average annual production during Japanese occupation (1942 to 1945).

(e) In addition the antimony content of antimonial slag obtained as a by-product of lead refinery during the years ended June 30 of that stated, was as follows: (long tons): 1942—591; 1943—771; 1944—379; 1945—386; 1946—540; 1947—149; 1948—131.

(f) Estimated.

(g) Secondary metal was recovered as follows (long tons): 1942—16,250; 1943—13,824; 1944—14,184; 1945—15,311; 1946—17,067; 1947—20,522; 1948—19,279.

Complex ores containing cobalt are produced in Greece, China and Korea, but figures are not available.

(a) Information not available.

(b) Metal recovered from smelter products plus cobalt contained in cobalt ores and residues exported. The figures for 1942 to 1944 exclude the content of ores placed on United States Government stock piles at Deloro, Ontario. This is recorded as production only when exported or recovered in Canadian smelters.

(c) The greater part of the 1948 production was shipments from stockpiles of ores mined in earlier years. See (b).

(d) Partly derived from imported material.

(e) Figures are not available for publication. Production was, however, higher in 1948 than in 1946 and 1947.

(a) Information not available.

(b) Copper content of blister and anode copper.

(c) British Zone only. Includes secondary metal.

(d) January to June only.

(e) Figures refer to black and blister copper and exclude electrolytic copper which is, in part, obtained from blister copper. Source: Centro Industrial de Vizcaya (U.N. Monthly Bull. of Stats.).

(f) U.S. Bureau of Mines.

(g) Estimated.

(h) Secondary metal was recovered as follows (long tons): 1942—828,353; 1943—969,685; 1944—849,055; 1945—898,675; 1946—717,452; 1947—858,697; 1948—868,561.

(i) Figures for 1942 to 1944 refer to smelter production. Later years to refinery production. The comparable figures for refinery were as follows (long tons): 1942—103,483; 1943—120,904; 1944—97,389.

(j) Southern Korea only.

(b) Declared imports represent a very small proportion of actual imports. These figures, therefore, represent exports of Rough Diamonds from the Union of South Africa, South-West Africa, Gold Coast, Sierra Leone, Tanganyika Territory, Angola and Belgian Congo to the United Kingdom as recorded by those countries, but exclude exports from Tanganyika Territory during 1942 and 1943, and from the Union of South Africa and South West Africa in 1947 as information is not available. In addition, provisional figures of Re-exports from the Union of South Africa to the United Kingdom of 260,490 carats—£160,770 for 1944, 28,384 carats—£26,208 for 1945 and 3,064,873 carats—£497,575 for 1946, 1,114,314 carats—£189,574 for January to June, 1947, are recorded in the Trade Returns.

(c) Excess of re-exports.

(d) Total imports. Re-exports amounted to 269,375 carats, valued £. S.A. 178,090.

(a) Information not available.

(b) In addition bog ore and iron ore (not used for smelting) were produced as follows:—

| | |
|------|------------------|
| 1942 | 9,408 long tons. |
| 1943 | 2,617 " |
| 1944 | 8,157 " |
| 1945 | (a) |

(c) Used mainly or entirely for purposes other than iron production.

(d) Exports.

(e) Shipments of marketable ore only.

(f) Including Alsace-Lorraine.

(g) British, American and French Zones.

(h) Estimated.

5,791 long tons.

* See also Sulphur (page 288).

(a) Information not available.

(b) Pyrite concentrate only.

(c) Produced as a by-product in the treatment of copper and copper-zinc ores.

(d) British and U.S. Zones only.

(e) In addition the sulphur content of mispickel and auriferous pyrites was as follows (long tons): 1942—893; 1943—702; 1944—3,547; 1945—5,771; 1946—5,839; 1947—6,496; 1948—7,351.

(f) Estimated.

(g) Revised. Figures which previously referred to mined production, now represent the production of saleable pyrites.

(a) Information not available.

(b) Mines Department figures. Official trade returns give 10,281 and 14,316 long tons for 1947 and 1948 respectively.

(c) Complete official Indian exports are not available. Figures represent imports into the United Kingdom and the United States from India.

(d) Years ended March 31 of year following that stated.

(e) Ilmenite is not recorded separately. The figures refer to exports of "Other ores" which were probably mainly ilmenite.

(f) January to October only.
